

Bio-Fish is an all purpose, nutrient rich fertilizer ideal for vegetable gardens and all types of outdoor plants, trees and shrubs. A good source of Nitrogen and Phosphorus, Bio-Fish can be used throughout the growing season to promote vigorous growth, plentiful fruit and beautiful blooms. Once applied, thoroughly mix into the soil surface and water in well.

GUARANTEED ANALYSIS

TOTAL NITROGEN (N)	7.0%	Derived from: Fis Meal, Sulfate of F
7.0% Water Insoluble Nitrogen		
AVAILABLE PHOSPHATE (P2O5)	7.0%	ALSO CONTAINS
SOLUBLE POTASH (K ₂ O)	2.0%	2.5 % Humic Acid
CALCIUM (Ca)	7.0%	Listed by the Orga (OMRI) for use in
SULFUR (S)	1.0%	

erived from: Fish Bone Meal, Fish Meal, Feather leal, Sulfate of Potash, Alfalfa Meal and Kelp Meal

ALSO CONTAINS NON-PLANT FOOD INGREDIENT(S): 2.5 % Humic Acids derived from Leonardite

Listed by the Organic Materials Review Institute (OMRI) for use in organic production.

APPLICATION RATES

2 ½ cups ≈ 1 lb; ½ cup ≈ 3.2 oz; 2 ½ tbsp ≈ 1 oz

Vegetable Gardens: To prepare new gardens, apply 5 lbs per 100 square feet and thoroughly mix into the top 3" of garden soil. For new transplants, add $\frac{1}{4}$ cup per hole, mix into soil and water in well. To feed established plants, side dress $\frac{1}{4}-\frac{1}{2}$ cup per plant, depending on plant size and desired growth rate, twice each month during the growing season.

F002174

Outdoor Containers: For new plantings, add 2 tbsp per gallon of soil and mix thoroughly **OR** add 5-10 lbs per cubic yard. For established plants, lightly mix 1-2 tbsp per gallon into the soil surface twice each month during the growing season.

Trees & Shrubs: Spread 1 lb per 2" of trunk diameter around the base outwards to the drip line, mix into soil surface and water in well. For new trees, prepare transplant hole and mix 1-2 cups with the backfill soil. Use amended soil to fill in around the new tree and water in well.

WHAT IS "N-P-K"?

NITROGEN (N) - Nitrogen is necessary for lush, green, leafy growth. An excess, however, will promote vegetative growth at the expense of fruit or flowers. Nitrogen is generally applied at higher concentrations in early growth stages. Use Down To Earth Bat Guano, Blood Meal or Feather Meal.

PHOSPHORUS (P) - Phosphorus will promote big, bright blooms and enhanced fruit production. Phosphorus is essential for fruiting, flowering, strong root growth and quality seed development. Use Down To Earth Fish Bone Meal or Seabird Guano.

POTASSIUM (K) - Potassium, or Potash, helps produce strong sturdy plants and quality fruit. Potassium naturally increases a plants resistance to all types of stress and is vital for cell growth and carbohydrate metabolism. Use Down To Earth Kelp Meal or Langbeinite.
