ORGANIC FOOTHILL FERTILIZER MIX O.5 - 4.O - 4.O Especially Created for Acidic Soils Low in Calcium & Phosphorus

This mix is a special blend of organic fertilizers and minerals especially created for Sierra Foothill soils and other acidic soils low in calcium and phosphorous.

Vegetable and Flower Beds: Apply 20 lbs per 100 sq.ft, to new soil or use 10 lbs per 100 sq.ft. on previously amended soils. These rates apply for every 6" of soil depth worked. If you are double-digging to a depth of 12", double the rates.

Fruit, Nut and Shade Trees: Evenly apply 20 lbs per 100 sg.ft. from the tree trunk to just beyond the drip line.

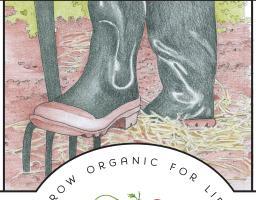

Transplanting Containers or Bare-root Plants: Use 1 lb per gallon of container size (i.e., use 5 lbs per 5 gallon container). For bare-root trees, use 3 - 8 lb per hole.

Lawns: When preparing the soil for a new lawn, work in 20 lbs per 100 sg.ft. To fertilize existing lawns, water in 10 lbs per 100 sg.ft. once a year, in Spring or Fall.
