HELPS PROTECT YOUR CLOTHES AND FURNISHINGS FROM COSTLY MOTH DAMAGE.

Note: This product is designed to alert you to a potential problem, and is designed to trap adult moths, **NOT** the larvae which do the actual damage.

Moth infestations require additional measures: Clothing should be thoroughly cleaned in a washing machine or by dry cleaning. You may also freeze items for a week in a standard freezer. Rugs and furniture should be steam-cleaned or treated by a pest control expert.

Directions For Use

Remove the enclosed lure from its protective packet. With the dot facing down, slide the lure under the flap and reclose top of box. Hang traps at eye level in closets and rooms to be protected. Pay special attention to items containing wool, cashmere or other animal hair. Use one or two traps for an average size room. Replace traps after 12 weeks.
