

FEEDING INSTRUCTIONS

HENS HAVE THE ABILITY TO ADJUST THEIR INTAKE OF CALCIUM ACCORDING TO INDIVIDUAL REQUIREMENTS. TO PROVIDE BIRDS THE OPPORTUNITY OF BALANCING THEIR OWN CALCIUM NEEDS, MIX 100 POUNDS OF PULLET SIZE SHELLS TO EACH TON OF COMPLETE FEED. HIGHER LEVELS OF SHELLS MAY BE NEEDED DEPENDING UPON FEED FORMULATIONS. IF EXCESSIVE AMOUNTS OF SHELLS ACCUMULATE IN THE FEED TROUGHS, REDUCE THE LEVEL OF ADDED SHELLS. THIS PRACTICE, REFERRED TO AS, "IN-FEED FREE CHOICE FEEDING OF CALCIUM", HAS THE FOLLOWING ADVANTAGES:

1. ELIMINATES LABOR REQUIRED IN SUPPLYING FREE CHOICE SHELLS IN SEPARATE FEEDERS, YET THE HENS STILL HAVE THE OPPORTUNITY TO BALANCE THEIR CALCIUM NEEDS.
2. HENS ARE NOT FORCED TO EAT MORE CALCIUM THAN THEIR INDIVIDUAL REQUIREMENTS.
3. PULLET SIZE SHELLS ARE NOT AS DUSTY OR UNPALATABLE AS FINELY GROUND FORMS OF CALCIUM.
4. REDUCES THE SEPARATION OF CALCIUM ASSOCIATED WITH THE HANDLING OF FEEDS USING FINELY GROUND HIGH DENSITY SOURCES OF CALCIUM.
5. MAINTAINS FREE-FLOW CHARACTERISTICS OF FEED AND HELPS TO PREVENT BRIDGING AND CAKING IN BULK AND AUTOMATIC FEEDING EQUIPMENT.

GUARANTEED ANALYSIS

Expressed as Calcium (Ca) Min 38.00%
Expressed as Calcium (Ca) Max. 39.80%
Calcium Carbonate (CaCO₃) not less than..... 97.00%
Expressed as Calcium Oxide (CaO) 54.32%

INGREDIENTS

CRUSHED SHELL CALCIUM CARBONATE
OYSTER SHELL AND CALCIUM, CLAM-COQUINA LIKE SHELL.

HEALTH HAZARDS

Product contains mechanical irritants to skins, eyes and respiratory tract. Prolonged inhalation of dust may cause delayed lung disease (silicosis and cancer). Crystalline silica inhaled in the form of quartz or cristobalite from occupational sources has been classified as carcinogenic to humans (Group I) by IARC.

PRECAUTIONS

Avoid breathing dust. Avoid contact with skin. Wear protective clothing including gloves, goggles or safety glasses with side shields and NIOSH approved dust mask.

FIRST AID

EYES: DO NOT RUB EYES. Wash eyes under slowly running water for 15 minutes or longer, making sure eyes are held wide open and moved slowly in every direction.

Ensure no solid particles remain in creases of eyelids. If so, continue to wash. If irritation persists, consult an ophthalmologist.

SKIN: Remove from source of irritation. Remove contaminated clothing, if necessary. Wash affected area thoroughly with soap and water. Wash contaminated clothing before reusing.

RESPIRATORY: Remove to fresh air immediately. Do not permit exposed person to remain in dusty atmosphere without respiratory protection.

RISQUES POUR LA SANTÉ

Ce produit contient des irritants mécaniques à la peau, aux yeux, et des voies respiratoire. Une inhalation prolongée de la poussière peut causer une maladie des poumons retardée (silicose et cancer). L'inhalation de cristalline silica en forme de quartz ou cristobalite a été classé de source professionnelle comme carcinogène pour les humains (Groupe I) par l'IARC.

PRÉCAUTIONS

Éviter de respirer la poussière. Éviter le contact avec la peau. Porter les vêtements de protection y compris les gants, les lunettes protectrices, ou les lunettes de sécurité qui protégeront de tous les côtés, et le masque couvre-poussière approuvé par NIOSH.

PREMIERS SOINS

YEUX: Ne pas se frotter les yeux. Rincer les yeux avec de l'eau qui coule lentement quinze minutes du moins, gardant les yeux grands ouverts et regardant dans toutes les directions. Assurer qu'aucune particule solide ne reste aux rides des paupières. Si c'est le cas, continuer à rincer les yeux. Si l'irritation continue, consulter un(e) ophtalmologue.

PEAU: Éloigner la peau de la source d'irritation. Enlever les vêtements contaminés, au cas où c'est nécessaire. Rincer soigneusement la peau contaminée avec du savon et de l'eau. Laver les vêtements contaminés avant de les porter.

RESPIRATOIRE: Enlever tout de suite pour de l'air frais. Ne pas permettre l'individu exposé à la poussière de rester dans l'atmosphère poussiéreuse sans protection respiratoire.
