

ORGANIC PRIMESTART BOOSTER BLEND

2.3 - 5.0 - 2.6 All The Major Nutrients To Ensure A PrimeStart

Use: This custom organic fertilizer blend is designed to get your transplants off to a great start. In their first year of growth, most perennial transplants don't need high levels of the major nutrients. This blend provides just what your plants need. It has small amounts of all the major nutrients, in combination with humic acids and Mycorrhizae.

Directions: Add Organic PrimeStart Booster Blend near the plant's roots as you back fill the planting hole. For each tree, use one 3 lb bag of Organic PrimeStart Booster Blend and 1 cu ft of organic compost. For grapes and blueberries, add 1 lb (2 heaping cups) per plant. For cane berries, add 3 Tbs per plant. For strawberries, add 1-2 Tbs per plant. Can also be used when transplanting vegetables or flower transplants. Use 1-2 Tbs per plant.

Storage: Between 40° - 85° F. Product expires two years from date stamped on bag.
