

Fight Plant and Lawn Diseases with Monterey Complete Disease Control BRAND

The Next Generation of Organic, OMRI Listed, Biofungicide/Biobactericide

- Kills pathogens by disrupting their cell walls through the release of lipopeptides
- Prevents infection by pathogens
- Promotes growth-promoting rhizobacterium for improved nutrient uptake
- Creates a symbiotic relationship with the roots and protects them through colonization of rhizobacterium on the root hairs, growing as the plant grows
- Increases yield through nutrient mining even in the absence of pathogens
- Works on leaf diseases such as Powdery Mildew, Downey Mildew, Botrytis, Early and Late Blight, Rusts, Brown Spot and Alternaria
- Works on root diseases like Fusarium, Verticillium, Pythium, Rhizoctonia, Scelrotina and Phytophthora

- Works on bacterial disease such as Fire Blight and others
- Approved for Organic Gardening
- OMRI & NOP Listed
- Can be used on lawns, trees, roses and other flowering plants, shrubs, house plants, vegetables and fruit trees.
