

Coconut Coir Fiber

Coconut Coir Fiber

A shredded coir fiber that makes an excellent addition to seed starting mixes and is a superior alternative to peat moss in all potting mediums. Coconut Coir Fiber is an environmentally friendly, renewable resource that is easy to use and completely biodegradable.

- High water holding capacity – up to 10 times its weight
- Retains and releases nutrients over extended periods
- Provides excellent aeration for substantial, healthy root development
- Naturally weed and pathogen free
- Enhances soil microbial life
- Neutral to slightly acidic pH

DIRECTIONS FOR USE:

Add water slowly and let Coconut Coir Fiber absorb and expand. Use hands or garden tools, break up any large pieces and mix until a fluffy texture is achieved and water is completely absorbed. Use as a replacement for peat moss in potting mediums, garden soils and seed starting mixes.

BRICK Approx. 1/3 cu. ft.

Product of Sri Lanka
