WHAT IS "N-P-K"?

NITROGEN (N)
- Nitrogen is necessary for lush, green, leafy growth. An excess, however, will promote vegetative growth at the expense of fruit or flowers. Nitrogen is generally applied at higher concentrations in early growth stages. Use Down To Earth Bat Guano, Blood Meal or Feather Meal.

PHOSPHORUS (P)
- Phosphorus will promote big, bright blooms and enhanced fruit production. Phosphorus is essential for fruiting, flowering, strong root growth and quality seed development. Use Down To Earth Fish Bone Meal or Seabird Guano.

POTASSIUM (K)
- Potassium, or Potash, helps produce strong sturdy plants and quality fruit. Potassium naturally increases a plant’s resistance to all types of stress and is vital for cell growth and carbohydrate metabolism. Use Down To Earth Acid Mix or Kelp Meal.

**APPLICATION RATES**

**GUARANTEED ANALYSIS**

Down To Earth Granular Humic Acids is a highly concentrated source of humic substances that is ideal for use on fields, turf and vegetable gardens. Carefully mined from one of the world’s richest deposits, it is derived from the ancient remains of decomposed organic plant materials and may increase micronutrient uptake by plants. Naturally occurring, unaltered oxidized lignite, crushed, screened and graded to a particle size of 1-3mm.

CONTAINS NON-PLANT FOOD INGREDIENT(S):

50% Humic Acids derived from Leonardite
50% Inert Ingredients
