Derived from mined seabird guano, potassium sulfate, and fish solubles. (Fish solubles are pH stabilized with phosphoric acid.)

DIRECTIONS FOR USE

Cotton
To improve production, Phytamin® All Purpose should be applied as a foliar spray during the early bloom stages of growth.

Application Rates: ½ - 1 gallon per acre applied in ample water to provide for thorough coverage. Begin treatments at first bloom up to 3 weeks after first bloom. Treatments may be made up to three times at 10 day intervals.

Trees, Fruit & Nuts
Application Rate: ½ - 1 gallon per acre applied in ample water to provide for thorough coverage. Begin treatments between first bloom and full bloom. Repeat treatments as necessary.

Grapes
Application Rate: ½ - 1 gallon per acre applied at 7 to 14 day intervals starting when spring cane growth reaches 12 inches in length.

Tomatoes
Application Rate: ½ - 1 gallon per acre at 10 to 14 day intervals throughout the bloom period.

Peppers
Application Rate: ½ - 1 gallon per acre applied during the early bloom period.

Vegetables
Do not apply as a foliar fertilizer to lettuce or other leaf crops.

SOIL APPLICATION

Yield and quality may be improved by regular treatments of Phytamin® All Purpose throughout the growing period.

Application Rates: ½ - 1 gallon per acre in sufficient water for thorough coverage. Two to three treatments should be made at 10 day intervals beginning at first flower bud.

Commercial Fertilizer
Information regarding the contents and levels of metals in this product is available on the Internet at http://www.aapfco.org/metals.htm, or by calling (800) 269-5690.

Always inject Phytamin® products in front of any filter system. Phytamin® All Purpose is mildly corrosive to aluminum in a concentrated form.
